

AFTER BUILDERS CLEANING

At Fluid Hygiene we have considerable experience in the area of 'After Builders Cleaning'; the final, deep clean of a building that is carried when construction or fit-out is complete, before the final hand over to the building owner or occupier.

CREATING THE RIGHT IMPRESSION

Just because a building interior is new, that doesn't mean it is clean! The construction process usually leaves behind a significant amount of dirt and detritus that needs to be removed in order to create the right impression with the intended occupant. Even if the construction teams have tidied up after themselves, the space is usually far from spotless.

“ FINDING A CLEANING COMPANY THAT CAN DELIVER AN EFFECTIVE 'AFTER BUILDERS' CLEAN AT A SENSIBLE PRICE IS MORE DIFFICULT THAN YOU WOULD THINK. NOW WE'VE FOUND FLUID OUR SEARCH IS OVER ”

FOR A REALLY THOROUGH CLEAN

It isn't just plaster and brick dust that needs to be removed. Many fixtures and fittings will need cleaning up following installation, labels will need to be peeled away, loose screws tightened, items of waste material swept up and paint spotting removed from floors and other surfaces – the list is endless.

Our teams are fully trained to make sure that our after builders cleaning service leaves no stone unturned. Several of our senior people have prior experience in the construction industry, so we know just what is needed to deliver a top quality result. We don't just sweep and mop. With Fluid Hygiene your windows are cleaned, metal fittings are polished, so called 'invisible' areas like cupboard interiors are dusted and floors are scrubbed. If necessary we will even clean the carpets and upholstery. In fact, we will do whatever it takes to make sure your building is spotless and your client is happy.
